

NUCLEATING AGENT MASTERBATCH

Designed For Improved Transparency

| Exceeding Your Expectations | www.blendcolours.com |

- **Blend Nucleating Agent MB**, is necessary in plastic moulds for lowering the haze & increasing the transparency of end articles
- During this process, formation of small size crystals enhance clarity by transmission of light
- These MB's remarkably lower down the cycle time of moulding process along with increase the dimensional stability of product

OVERVIEW

Blend Nucleating Agent MB provides you:

- High clarity, increased transparency
- Enhances the clarity of PP products
- Good optical properties
- Improves stiffness
- Improves stress crack resistance
- Faster crystallization

OTHER DETAILS

Application

- Bottles
- Containers
- Medical devices

Technical Details

- Density: 1.90-2.00
- Dosage: 2-3%
- Heat Stability: 300°C

Performances

- No odor
- Excellent smoothness
