

BLEND FOAMING MASTERBATCH

Designed For Weight Reduction

- Blend Foaming MB, activates & foam just before the processing temperature of the host polymer
- Capable of achieving weight saving, prevention of sink marks, & improvement of buffering & thermal insulating effects
- We have two variants of foaming agents
 - i. Exothermic Foaming MB &
 - ii. Endothermic Foaming MB

Application

- Roto Tank
- Extruded Pipe
- Injection Molding Pallets
- Automotive Parts

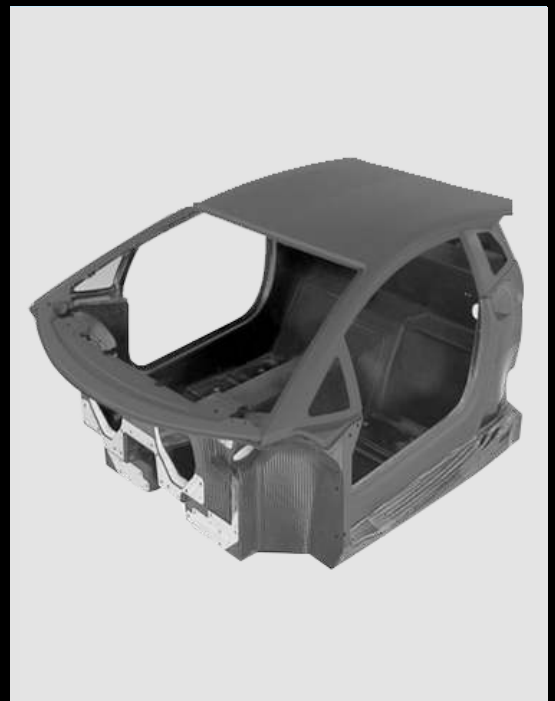

Technical Details

- Base Polymer: PE & PP
- Dosage: 2-4%
- Color: Light Yellow

Performances

- Reduction of plastic part weight by upto 15-20% for critical moulding application
- Eliminates sink marks
