

IMPACT MODIFIER MASTERBATCH

Designed For Plastics Strength

- Blend Impact Modifier MB, are added to the polymer or compound material which improves impact & resilience properties
- Compatible with PE & PP extrusion, injection & blow molding products
- It helps to increase flexibility, impact strength to meet physical property
- Ideal modifier for products requiring high impact property, tough, flexible durable, impact resistance, etc.

Application

- Packaging
- Industrial Goods
- Automotive
- Pipes & Fitting

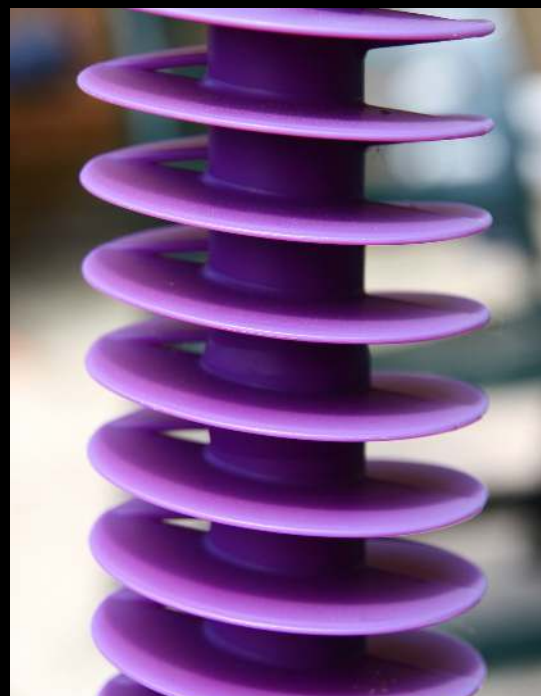

Technical Details

- Base Polymer: PE & PP
- Dosage: 4-6%
- Appearance: Transparent

Performances

- Good weather resistance
- 40-60% improvement in toughness / impact resistance
