

BLEND PET - ANTIBLOCK MB

Designed For Blockage

- In PET Sheet there is a tendency towards blocking each other material
- Blocking causes several handling problems
- An Antiblock additive present in the resin microscopically protrudes from the sheet surface. This creates distance between the two layers, thereby minimizing blockage

Application

- PET Sheets

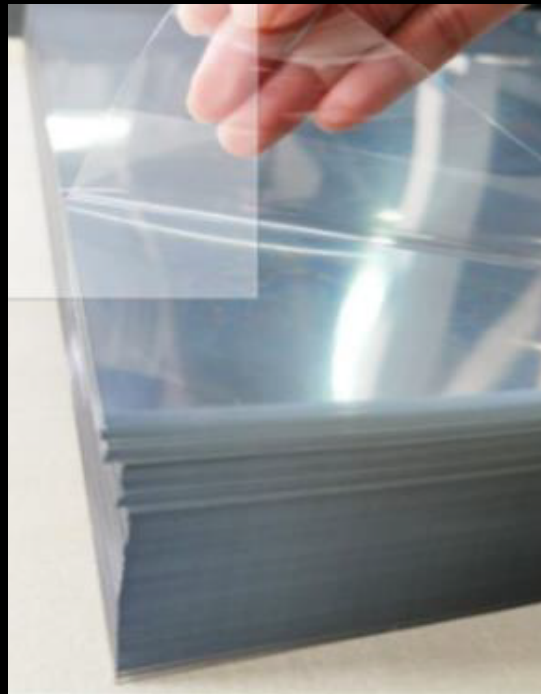

Technical Details

- Dosage: 2-5%
- Colour: Transparent
- Density: 1.35-1.45

Performances

- Reduce the adhesion effect of plastic products distinctly
- High film clarity
- Low use levels
