

COMPATIBILIZER MASTERBATCH

Designed For Compatibility

- Blend Compatibilizer MB are based on reactive chemical groups & functional compatibilizer which are chemically grafted on polyolefins
- It can be used anywhere having compatibility issue with two immiscible polymers & blends
- It will also provide strength when used as filling material in ACP panels
- It enhances the processing by providing workable MFI to the process

Application

- Multilayer film recycle
- PE/Nylon
- PE/EVOH
- PE/PET

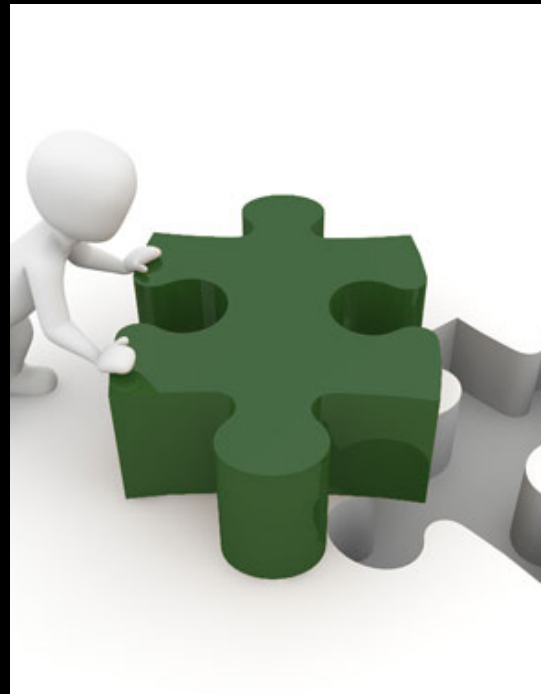

Technical Details

- Dosage: 2-4%
- Density: 0.88-0.92 g/cc

Performances

- Improve mechanical strength, dispersion & compatibility between two polymers
- Value addition to recycling products
