

PIB MASTERBATCH

Designed For Material Safety

- **Blend PIB MB** is made up of special high molecular weight polyisobutylene having excellent compatibility with Polyolefine resin
- It disperses very evenly over the entire film and has self-adhesive qualities
- Only one layer of the uppermost multi-layer film uses PIB MB, and the adding ratio is based on the layer's intended usage and film thickness

Application

- Stretch Film
- Cling Film
- Wrap Film

Technical Details

- Base polymer: LLDPE
- Dosage: 4-8%
- Density: 0.88-0.92 g/cc
- Active Content: 40-60%

Performances

- Non-sticky / free-flowing pellets offering outstanding cling properties
