

Designed for Eco Friendly Plastic

- **Blend Compostable Compound** has been developed for the manufacturing of plastic films and laminates for various application
- It exhibits high mechanical properties, sealing strength & colourability
- The basic ingredients includes PBAT, PLA, Starch & fine minerals

Application

- Carry Bags, Courier Bags
- Food Packaging
- Garbage Bags, Shopping Bags

Technical Details

- Usage 100% - Compound
- Test Standard - ISO 17088, Under progress

Performances

- Does not leave any toxic residue & micro plastics

Plastic Free

GMO Free
